DETAILED ACTION

Response to Arguments

Applicant's arguments, see Remarks/Arguments, filed November 3rd, 2003, with respect to the rejection of claims 1-6, 10-12, and 47-51 have been fully considered and are persuasive. The rejection of these claims has been withdrawn.

Examiner's Reasons for Allowance

Claims 1-51 are allowed over the prior art of record for the reasons previously stated in Office Action (paper number 3) and in the Remarks filed on November 3rd, 2003 (see page 5).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Additional Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The prior art made of record is Bishop et al. (USPN 6,263,123).

Bishop discloses an optical apparatus comprising an input port providing a multi-wavelength optical signal, an output port, a wavelength disperser that separates the optical signal by wavelength into multiple spectral channels having a predetermined relative arrangement, and an array of micromirrors positioned such that a group of the micromirrors receives a unique one of the spectral channels the group being pivotable such that optical power levels of the channels coupled into the output port carry distinct dither modulation signals.

Conclusion
